Maxxon Corporation
920 Hamel Road
Hamel, MN 55340
Attn: Phil Ciesiulka

Subject: Unglued Approval

Shaw Technical Support approves the use of Maxxon's Unglued adhesive removal.

Shaw Technical Support has evaluated the Unglued adhesive removal in multiple locations. Unglued has proven to assist the flooring installer to easily remove old adhesives. Once the old adhesive has been removed, the substrate must be cleaned in order to remove any surface residuals that remain. Once the cleaning has been performed, allow the surface to dry prior to applying patching compounds, self-levelers or adhesives.

When a proper and thorough cleaning has been performed, there have been no detrimental effects to the new adhesive or product after installation.

Please contact Shaw Technical support for any additional information.

Respectfully,

Woody Belflower
Director – Field Services
